Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASONS FOR ALLOWANCE

1. Claims 32-84 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicants' arguments of Paper No. 9, (Interview Summary) have been fully considered and found persuasive. Further, Applicants newly amended claims, drawing said claims commensurate with the scope of Applicants' arguments, better set forth the patentable distinction of the claims over the prior art of record, and now place the claims in condition for allowance.

While updating the search, the Examiner disclosed two closely related prior art patents to Applicants' invention: SIMPSON et al. US 6,174,425 B1 and FORSTER et al. US 6,334,419 B1.

SIMPSON et al., disclose a process for depositing a layer of material over a substrate wherein the method comprises placing the substrate in a plating system including a first electrode (anode), a second electrode electrically connected to the substrate and biasing the first electrode (anode) to a first potential and the second electrode (cathode substrate) to a second potential to deposit the layer of material, wherein the first and second potentials are different (column 6, line 65 through col. 7, line). The process taught by SIMPSON et al. further comprises applying the biasing current by generating a pulsing current (col. 7, lines 15-17). While SIMPSON et al. teach a method wherein first and second biasing currents are used, the instant claims do not read over the prior art as the first and second biasing voltage as well as the pulsing voltage are applied to the seed layer of the substrate in the instant invention, as

opposed to the prior art's application of biasing voltage to different electrodes (anode and cathode substrate) of the system.

The FORSTER et al. method as shown in Figure 15 and 16 employs a similar varied voltage deposition onto a substrate surface. The FORSTER et al. method applies biasing voltage to the substrate to control deposition and avoid excessive deposition on the sidewalls of device features by modulating bias to the target (col. 11, lines 5-64). However, FORSTER et al. differs from the instant invention as it involves sputter deposition and does not provide for electrochemical deposition. Moreover, the waveform and biasing pattern employed by FORSTER et al. differs significantly from the instant embodiment.

Upon a reasonable search of the prior art, the Examiner was unable to find a teaching of Applicants' express method (nor apparatus for performing the method) for depositing metal on a substrate wherein the method comprises applying first and second biasing voltages whereby the second biasing voltage is higher than the first biasing voltage and further application of a pulsed biasing voltage applied to the seed layer during electrodeposition. Applicant's novel method and apparatus offers an improvement over the prior art as it allows for seamless trench-filling of damascene structures on semiconductor substrates and further more uniform deposition of conductive material thin-film layers thereon with minimal need for subsequent planarization. The novel method and apparatus of the instant invention cuts down on processing steps and therefore overall manufacturing cost associated with subsequent removal processes.
